## Genie Complete - The Ultimate Slimming & Toning System

### Take 10 Non-Surgical Face Lift

As we get older our muscles shrink causing surrounding fat and tissue to take on a drooping appearance. With exercise and the right diet we can generally keep our bodies in shape but the facial muscles are more difficult to exercise until now.

When the facial muscles begin to shrink the drooping effect on the face can be very aging. By rebuilding the aging muscle mass to its previous state the face is fuller and benefits from a visible lift which can be retained with regular treatments. This full, healthier look also helps reduce the appearance of lines and wrinkles.

The Genie Take Ten is a perfectly natural way to exercise facial muscles.

Because we are "power" building, a 10 minute treatment is sufficient to achieve all that is possible in one session. For 24 hours after a treatment the muscles are still working and re-generating themselves.

### Benefits of the Genie Take Ten

Medically Proven Technology

Treatments Take Only from Ten Minutes

Lift Brows, Enhance Cheekbones, Lift Corner of Mouth, Fills Out

Upper Lip, Sharpens Jaw Line, Helps Reduce Crepe Neck

Take Ten is simply to use and easy to apply

Clients do not need to remove eye make up

Skin texture and tone improves

## Micro-Tech

### Face & Body Skin Renewal

This module uses a micro-current to treat problem areas of the face and body such as pock marks, scars, stretch marks and loose skin around the bust area, abdomen and hands, it's also used in the last stage of a cellulite treatment to smooth out orange peel affect. Micro-current has healing properties and increases ATP levels which are muscle energy levels. This allows natural production of protein synthesis (elasticity of the skin) and Fibroblast activity (collagen production) giving the skin a firmer smoother, healthier look.

Genie's internal computer has refined the micro-currents to work in harmony with the body's own bio-electrical field. The body works from electrical impulses and therefore the micro-current helps tone, lift and re-educate the muscles back to their original position.

Micro-Current treatments are generally run as a course, averaging between 10 and 15 treatments. Some clients may need more than one course; this will depend on the client's skin tissue and their muscle tone.

### Treatments available with Micro-Tech:

- Bust lifting
- Smoothes out orange peel
- Lighten scars
- Tones loose skin
- Reduces lines and wrinkles
- Brow lift
- Plump lips
- Reduces stretch marks

On completion of a course the client requires booster treatments, which occurs monthly or x2 monthly not only maintains but continues to build.
